N
10^1 10^2 10^3 10^4 10^5 10^6 10^7 10^8
(a)
above each curve
the middle beats the ends
below each curve
the ends beat the middle
D elephant
F aging
A z_N
B $k = 2, 3, 4$
E planar
T at the crossing
0 5 10 15 20 25 30
4 6 8 10 12 14 16 18
$L = \log N$
F heavy-tailed runs
(b)
$\alpha > \varphi$: middle
beats the ends
$\alpha < \varphi$: ends
beat the middle
$e(\alpha) = 1 - \alpha + 1/\alpha$
1 0.5 0 −0.5
1 φ 2
run exponent α
